## Encryption News: September 2019

### The Advantages of Using SDS E-Business Server

As a user of [SDS E-Business Server](#), you're benefitting from the highest levels of protection for data stored internally, transmitted within your organization, and distributed beyond your firewalls. When you send sensitive or proprietary data offsite, you know E-Business Server delivers the encryption and security tools you need.

### But what else can this PGP encryption tool do for you?

*SDS E-Business Server...*

- Helps you to meet data security regulations like GDPR with its strong signature creation and reliable authentication.
- Simplifies data protection by allowing you to configure and manage advanced data security on multiple systems from a single console.
- Allows you quickly and easily encrypt your custom business applications using its APIs for C, C++, C#, and Java.
- Lets you easily embed security into applications or batch processing using mainframe scripting or native APIs.
- Conserves resources by dramatically reducing file sizes and bandwidth consumption.

*Could you be making greater use of E-Business Server?*

**Find out all the different ways that SDS E-Business Server can help your organization's security and compliance needs on z/OS and beyond:**
