

## Release of Virtel v4.63 Announcement

SDS and their partner Virtel, a Syspertec Group company, proudly announces the **release of Virtel 4.63** – the latest version of our web-enablement suite designed to modernize 3270 mainframe applications with zero code changes. This new version focuses on four key pillars: **connectivity**, **security**, **usability**, and **administration**.

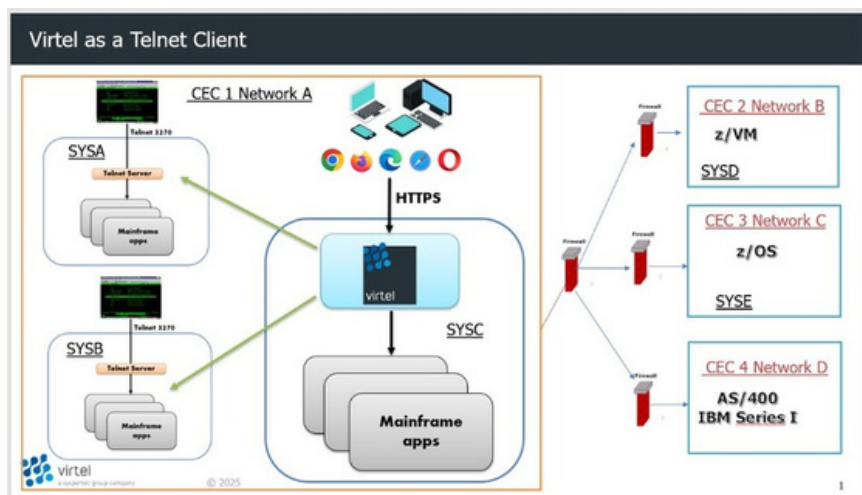

### Highlights:

- **Native TN3270 client** – Simplify access to multiple mainframe environments via a single, centralized gateway.
- **End-to-end security** – SSO integration (AD, OIDC, SAML), enhanced session token management, customizable HTTP headers, and tighter RACF/TSS integration.
- **Enhanced user experience** – Better TSO/OMVS stability, improved 3270 interface visibility and theming with custom CSS.
- **Improved administration** – New 3270 admin panel, LU Nailing management, VIRCONF versioning, and Virplex support.
- **Performance & compatibility** – Support for ICC consoles, model 3/4/5 terminals, and stronger proxy handling with Long Poll Keepalive.

## Tips for Virtel Administrators

The Virtel administrator can now define Telnet TN3270 access to multiply mainframes, z/OS, z/VM, IBM Series I, OSA ICC MVS Consoles. Through one Virtel STC instance.

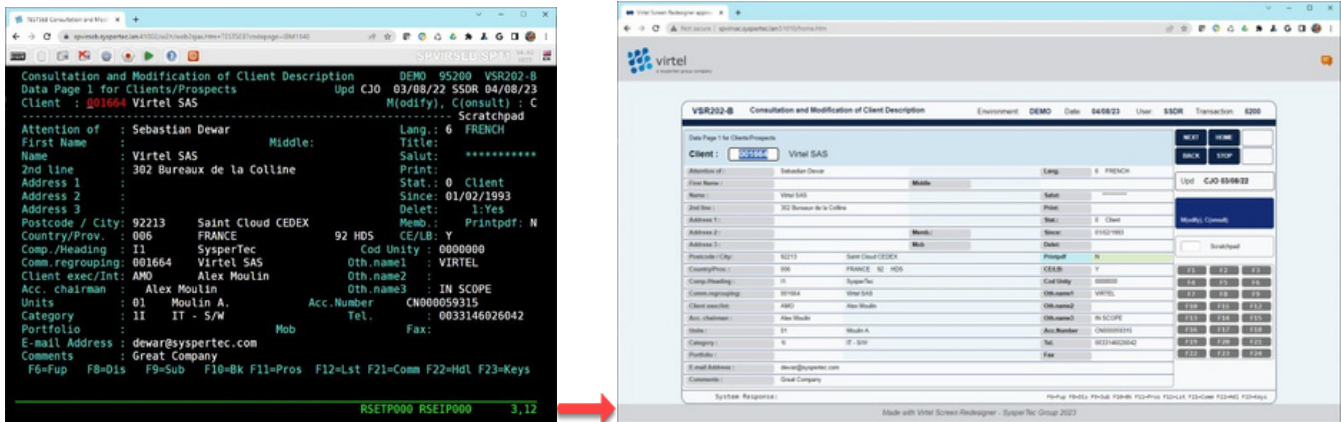

## Release of Virtel Screen Redesigner v1.08.03 Announcement

### Virtel Screen Redesigner: Say Goodbye to Green Screens – Without Writing a Line of Code!

Virtel, a Syspertec Group company, proudly announces the **release of Virtel Screen Redesigner v1.08.03**, the latest version of our web-enablement suite designed to modernize 3270 mainframe applications with zero code changes.

Still relying on 3270 mainframe applications? It's time to reimagine the user experience—without the hassle of rewriting or redeveloping your apps.

With **Virtel Screen Redesigner**, you can transform old-school green screens into sleek, modern web interfaces—quickly, intuitively, and without touching the existing code. Our **no-code** tool empowers your mainframe team to create branded, interactive web pages with ease.

- ✓ Intuitive drag-and-drop editor
- ✓ Built-in widgets (menus, dropdowns, buttons...)
- ✓ Runs directly on the mainframe – no external servers
- ✓ Let users choose: classic or modern interface
- ✓ No disruption, no risk to core systems

Why choose complexity when you can go simple *and* powerful?

#### Highlights:

- **Menu Widget ID** - Improved handling of the menu widget ID, making it usable when multiple menus are present on the same screen.
- **Error Handling** - All errors are now displayed in a dialog and logged.
- **Logging exchange between VSR and Virtel** - Enhanced logging of interactions between VSR and Virtel.
- **Initial Component Layout** - Content in an initial component now wraps to a new line when necessary.
- **Screen case Creation and unexpected character** - If an unexpected character is present during screen case creation, an error message is displayed.
- **Unexpected Characters Management** - A new JSON file is generated to handle unexpected characters more effectively.

VIRTEL continues to offer free, no obligation trials of the complete Virtel Web Suite of mainframe access, UI modernization, and application integration technologies, complete with expert technical support during the trial period. Please contact SDS for details.
