Release of Virtel v4.63 Announcement

Planned release date is scheduled for late November 2025 to incorporate additional connectivity and security enhancements.

Stay tuned for more details and the 4.63 Release Announcement in the coming weeks.

Tips for Virtel Administrators

The Virtel AppMenu allows administrators to define a **bulletin message board** or a specific message to be displayed upon user login. When a user connects to Virtel, the system presents the message before the user gains access to their applications. This is a common method for broadcasting important information like scheduled maintenance, system outages, or other critical announcements.

The screenshot displays the SYSPERTEC Virtel Session Manager Demo interface. At the top, the header includes the syspertec group logo, the title "SYSPERTEC Virtel Session Manager Demo", and the subtitle "Virtel Application Menu". On the right side of the header, system information is listed: "VIRTEL Version 4.63", "Line A-HTTP", and "Entry Point ALIWHOST". A prominent red-bordered box at the top of the main content area contains a system broadcast message: "Notice: The System will be shutdown at midnight tonight. Please contact the Helpdesk with any questions." Below this message, a list of application categories is shown, each with a sub-menu. A green arrow points from the "System broadcast Message" label to the red-bordered message box. The application categories and their sub-menus are: "TSO Production on SPU1 System" (with sub-items TSOPAUTO and TSOP4), "TSO Test on SPU1 system" (with sub-item TSOT), "TSO on SPU2 System", "CICS Test and Deveoplment Sandbox Regions", "MultiTerm Sesison Manager" (with sub-item MULTI), "CICS Production Regions", "Virtel Administration Functions", "TN3270 IP Connections to z Servers", "Applications on SYSPLEX SPTPLXP1 SPT1 or SPT2", "VIRTEL USS Table for Client testing", and "Other Sessions". To the right of the "TSO Production on SPU1 System" category, there are links: "Logon to TSO (Auto signon to TSO)", "Logon to TSO with SEC=4", and "Logon to Test System". To the right of the "MultiTerm Sesison Manager" category, there is a link: "Logon to Multiterm Session Manager".

Virtel Screen Redesigner: Say Goodbye to Green Screens – Without Writing a Line of Code!

Still relying on 3270 mainframe applications? It's time to reimagine the user experience—without the hassle of rewriting or redeveloping your apps.

With **Virtel Screen Redesigner**, you can transform old-school green screens into sleek, modern web interfaces—quickly, intuitively, and without touching the existing code. Our **no-code** tool empowers your mainframe team to create branded, interactive web pages with ease.

- ☒ Intuitive drag-and-drop editor
- ☒ Built-in widgets (menus, dropdowns, buttons...)
- ☒ Runs directly on the mainframe – no external servers
- ☒ Let users choose: classic or modern interface
- ☒ No disruption, no risk to core systems

Why choose complexity when you can go simple *and* powerful?

VIRTEL continues to offer free, no obligation trials of the complete Virtel Web Suite of mainframe access, UI modernization, and application integration technologies, complete with expert technical support during the trial period. Please contact SDS for details.
