SDS IRONSPHERE for z/OS

Key Features & Benefits

Automated STIG Monitoring

Monitoring for DISA STIG compliance is a challenge that's usually undertaken by unreliable, homegrown solutions. Change that today!

Real-time Risk Awareness

Maintain a higher level of security continuously by running scans on a regular basis. Enjoy painless audits with this ISCM solution.

Browser GUI Display

Several options to view scan results that are ideal for security teams, upper-level managers, and the z/OS mainframe team.

Remediation Steps Provided

With every failed check, the steps needed to fix the vulnerability are laid out in an easy-to-follow manner via browser.

Simplify Compliance Effort

Complying with DISA STIGs requires substantial effort on a continual basis. Let IronSphere take care of the tedious work automatically.

Configure your own Checks

If you require additional checks not covered by the DISA STIGs for z/OS, you can create your own or we'll configure them for you.

SDS MAINFRAME SECURITY

AUTOMATE & SIMPLIFY • ELIMINATE GAPS • GAIN COMPLIANCE
