

Software Diversified Services

Quality Mainframe Software since 1982

SDS develops software for IBM® z/OS®, z/VM®, z/VSE®, and additional distributed platforms for SDS E-Business Server® data encryption.

SDS was founded in 1982 and now supports over 25 mainframe products that focus on security, encryption, data compression, performance monitoring, report distribution, and client-server applications.

SDS also develops, supports, and distributes E-Business Server for data encryption and authentication on z/OS, Linux, Unix, and Windows® platforms.

Technical support works hand-in-hand with development at headquarters in Minneapolis, MN, to deliver customer satisfaction and product value. SDS is noted for having the highest quality software and award-winning, expert technical support and service.

SDS retains more than 1,000 clients worldwide, including many Global 500 companies in banking, finance, insurance, and retail, as well as local, state, and national governments.

SDS Software Solutions

z/OS Security & Compliance

VitalSigns SIEM Agent™ for z/OS - Integrate mainframe security events into any enterprise SIEM

VFTP-SSH Collaboration - Complete FTP security for z/OS; no JCL changes needed

SDS E-Business Server® for z/OS - Rock-solid PGP encryption for data at rest

SDS IronSphere for z/OS - Automated DISA STIG compliance monitoring for z/OS

Mainframe Network Management

VitalSigns for FTP™ - Snap-in security for file transfers to & from z/OS

VitalSigns for IP™ - Complete IP monitoring on z/OS

VitalSigns for NAC™ - Replace legacy mainframe network monitoring

Mainframe Performance & Optimization

ConicIT® - Predictive operations management and analysis for z/OS

Multiterm™ for z/OS, z/VM, & z/VSE - Premier session manager for z Series mainframes

VitalSigns for z Tuning™ - System analysis for money-saving performance

Application Access & Modernization

Virtel® Web Access - Ultra-thin and secure 3270 TE on any device

Virtel® Web Modernization - Serve host transactions as user-friendly web pages (GUIs)

Virtel® Web Integration - Create interactive bidirectional connections; integrate host & web

CICS Management

CAFC™ - CICS Application File Control system software

IPCP™ Plus for z/OS & z/VSE - Premier file control utility for z/OS & z/VSE

Encryption & SSH Solutions

SDS E-Business Server® - Multi-platform PGP encryption for data at rest

Tectia® SSH - Server and client that secures and encrypts file transfers and more

Universal SSH Key Manager® - Centralize, simplify, and automate SSH key management
