

Key Features & Benefits

Automatic FTP-to-SFTP

The VFTP-SSH Collaboration will automatically turn your FTP liability into Secure FTP.

No JCL Changes Required

Unlike with other solutions, you won't have to put in all the time and effort needed to convert your business logic.

Gain FTP Compliance

Securing your file transfer process is a common data compliance requirement, even on z/OS.

Multi-layered Security

VFTP integrates the z/OS FTP server with your mainframe SAF security. Tectia SSH provides secure SSH tunnels, authentication, and encryption.

Gain Real-Time Visibility

VFTP's browser GUI provides real-time, comprehensive information on every incoming and outgoing file transfer.

Automate Batch Jobs

With VFTP's FTP Control Language (FCL), you can effectively automate mainframe batch jobs.
