

VIRTEL[®] WEB ACCESS

Key Features & Benefits

3270 TE in a Web Browser

Save up to 80% on your 3270 terminal emulation costs with Virtel. Retain 3270 ergonomics while improving reliability, security, and more.

Ultra-thin and Ultra-secure

The ultra-thin architecture of VWA promotes security, mobility, and flexibility. Serve 3270 screens over encrypted HTTPS connections.

Use Any Web-enabled Device

VWA can easily assist you with your digital transformation and work at home initiatives. Access the mainframe via browser with VWA.

Centralize Install and Support

No matter how many workstations are using VWA, install and updates are done only once. Support needs and costs are significantly lowered.

Eliminate Security Exposures

Virtel eliminates the need for vulnerable Java applets and the deprecated Java plugin. With VWA, the host regains full access control to assets.

Modernization and Integration

The same technology that is used for VWA can be applied to assist with legacy application modernization and complete web integration.
