 Virtel Web Modernization  
 Virtel Web Integration

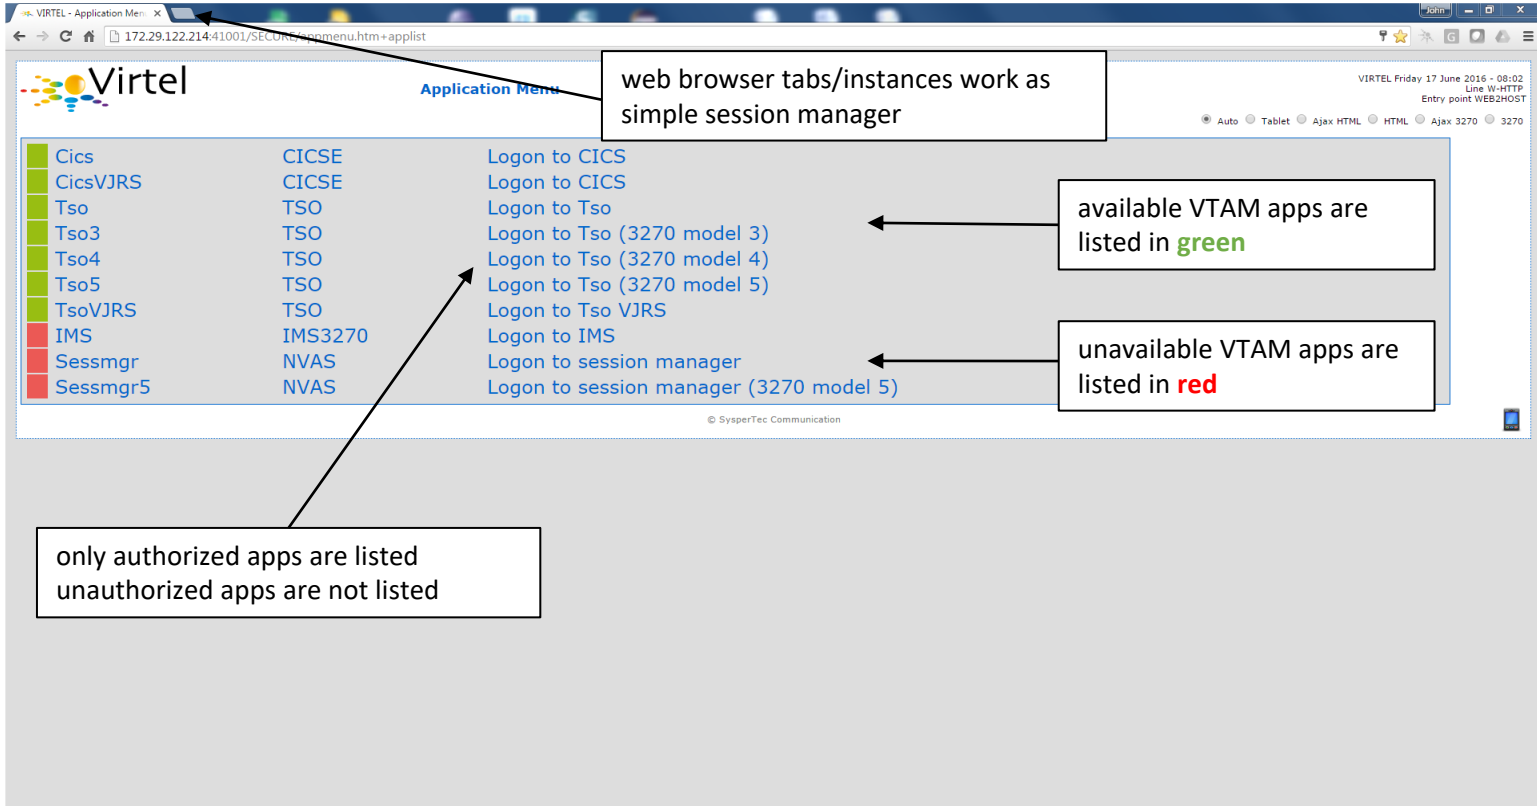

## ❖ Replaces applet-based TN3270 emulators

# Starting a 3270 TE Session

- ❖ Point browser to installation-defined URL
- ❖ Enter credentials in sign-on box
- ❖ Credentials verified against RACF-ACF2-TSS
  - Credentials → authentication → user group → authorization
- ❖ Three possible session startups:
  - USSTAB
  - Session manager – application menu
  - Virtel - application menu

# Virtel Application Menu (Pre-2021)

web browser tabs/instances work as simple session manager

Cics	CICSE	Logon to CICS
CicsVJRS	CICSE	Logon to CICS
Tso	TSO	Logon to Tso
Tso3	TSO	Logon to Tso (3270 model 3)
Tso4	TSO	Logon to Tso (3270 model 4)
Tso5	TSO	Logon to Tso (3270 model 5)

# Customer-Driven Innovation

- ❖ Past 5+ years
  - Used by some Virtel customers to replace third-party session manager
- ❖ Q4 2020 = tiered menu
- ❖ Q1 2021 = collapsible menu sections
- ❖ June 2021 = screen lock

# Virtel “Tiered” Application Menu

## Demonstration

- ▶ SDS: founded in 1982, corporate HQs in MN
- ▶ SysperTec: SME in the 3270 TE tech market
- ▶ We act on client feedback
  - Session Manager was menu enhancement request
  - Screen Lock was an enhancement request to meet security and compliance regulations
- ▶ POC available
- ▶ Questions will be answered after session via email
