## SDS E-Business Server® Product Entitlement Definitions

An SDS E-Business Server license is based on one or more of these definitions; refer to your Grant Letter and License Agreement.

<b>CPU</b>	Central Processing Unit. The CPU is the primary component of a computer that processes instructions from a computer's programs. The CPU contains at least one processing core (CPU core), which is the actual chip inside the CPU that performs calculations.
<b>CPU Core</b>	A single, independent physical processing unit (execution core) within a CPU. For virtual machines, this will be equal to the number of CPU cores reported by the guest operating system.
<b>LPAR</b>	Logical Partition. A logical segmentation of a mainframe's memory and other resources that allows it to run its own copy of the operating system and associated applications. LPARs are caused by special hardware circuits and allow multiple system images to run in one machine. This can be multiple instances of the same operating system or different operating systems.
<b>MIPS</b>	Millions of Instructions Per Second. A unit of measuring the processing power of different types of computers.

## License Types

Production License	Allows a customer to download, install, maintain, and operate E-Business Server in the regular operating environment.
Non-Production License	Allows a customer to copy E-Business Server, then install and use it for development and testing purposes.
Evaluation License	Allows a potential customer to install and use E-Business Server for a specified time period for the purpose of evaluating the software.
Full License	Allows a customer to install and use E-Business Server on the following distributed platforms: AIX, HPUX, Linux, Solaris, Windows. Licensed per CPU.
Partner License	Allows a customer to install and use E-Business Server on the following distributed platforms: AIX, HPUX, Linux, Solaris, Windows. Licensed per CPU. This license has a limitation of only one public key other than its own to exchange files with only one partner.
z/OS License	Allows a customer to install and use E-Business Server on z/OS. Licensed per MIP.
